

The Client

Peak Completions is a leading oil and gas completion technology provider. They offer in-house engineering, manufacturing, and dedicated service to operators around the world.

The Challenge

Peak Completions was looking to sell their asset in Snyder, TX. They listed it with a local residential broker which sat on the market for over a year. Peak Completions decided they needed a professional industrial real estate company to get the job done.

The Solution

Peak Completions found NRG Realty Group through online research and reached out to Tucker Schneemann. Tucker utilized NRG's marketing resources to list their asset on industry leading-platforms. A lead came in from Plastic Welding and Fabrication, LTD (PWF) a manufacturer in Austin looking to relocate their business to a more affordable market. Tucker introduced PWF to the Snyder Development Corporation to better understand the labor force, economic environment, and the city's needs and requirements for doing business. The parties closed on the sale at 100% of the asking rate.

Transaction Details

Tucker knew the listing would've never been seen on the MLS or through residential efforts. He saw the opportunity to harness the power of NRG's marketing department who got the property in front of the right buyers. Tucker worked with local business resources to ensure the buyers it was the right location to set up shop. NRG's brokerage services utilize our vast network of industry experts from marketing to business resources.
